

QUICK START GUIDE

Rockbot Remote App

On-the-fly mobile control of your content experience

Getting started

1. Search Rockbot Remote in the **Apple Store** or on **Google Play** and download to your device.

2. Log in using your Rockbot Staff Account, and select your venue.

Music

3. Select the three dots in the upper right-hand corner of the Music tab to exclude or ban current songs.
 - a. **Exclude** song/artist from playlist removes a song from a playlist.
 - b. **Ban** song/artist from playlist bans an artist or song from all playlists.
 - c. **Report** song lets you report improper lyrics, energy level, or audio quality.
4. Now Playing shows the current playlist. Select the playlist to manually override the current playlist selection.
5. Stop the music, skip the music, or see previous/upcoming songs using the quick-action buttons on the music home screen.

Tip: Visit dashboard.rockbot.com on a web browser to adjust venue settings.

TV

6. Select Now Showing to change the channel. Select Channel to change the channel.
7. Stop TV, change the channel, or switch from L-bar to full screen using the quick-action buttons on the TV home screen.

More options

8. Change the playlist, check your Music and TV settings, or review your Activity Log under the Settings tab.

 **Tip:** Visit dashboard.rockbot.com on a web browser to adjust venue settings.
